

For 75 years, Charles River employees have worked together to assist in the discovery, development, and safe manufacture of new drug therapies. When you join our family, you will have a significant impact on the health and well-being of people across the globe. Whether your background is in life sciences, finance, IT, sales or another area, your skills will play an important role in the work we perform. In return, we'll help you build a career that you can feel passionate about.

As a **Veterinary Pathologist 2, Medical Device** for our team located in **Boisbriand, Quebec, Canada**, you will mainly be responsible for tissue evaluation and interpretation of assigned studies. Your contribution will ensure the health of our animals, as well as the integrity of our pre-clinical studies.

In this role, primary **responsibilities** include:

- Interact with clients to assure satisfaction.
- Perform macroscopic and microscopic tissue evaluations and interpretation of assigned studies, including interpretation of high-resolution radiography, microCT and histomorphometry results.
- Assist with necropsy supervision.
- Write comprehensive report narratives detailing all medical devices effects.
- Work with study directors, as needed, to ensure that the data is accurately integrated into the study reports.
- May participate in pathology working group (PWG) as an observer.
- Provide training, technical guidance and leadership to laboratory staff and may provide training, guidance, and leadership to less experienced pathologists.
- May serve as a consultant in pathology-related issues.
- May provide scientific expertise for experimental design and other aspects of research studies, as needed.
- Maintain an up-to-date knowledge in medical device pathology (e.g., attendance at pathology meetings).
- Participate in the global CRL committees/projects, as needed.

Key Elements

If you possess the following **qualifications**, we will train you in the rest:

- Open to new graduates, eligible for ACVP/ECVP board exam.
- Doctorate degree (D.V.M/V.M.D.) from an accredited veterinary school, or acceptable international equivalent in veterinary medicine.
- Minimum of 3 years of pathology experience post residency.
- Working knowledge of clinical pathology preferred; specialized training and/or experience in medical device pathology preferred.
- Board certification with the American College of Veterinary Pathologists (A.C.V.P.) or European College of Veterinary Pathologists (E.C.V.P) required to enter the level grade.
- Demonstrated success in technical proficiency, scientific creativity, collaboration with others and independent thought.
- Ability to work on problems of diverse scope in which analysis of data requires evaluation of multiple factors.

- Ability to exercise judgement within generally defined practices and policies in selecting methods or techniques for obtaining solutions.
- Working knowledge of related computer applications.

Role Specific Information:

Location: Boisbriand, Quebec, Canada

Schedule: Onsite with Hybrid possibility.

Why Charles River?
